## **Celebrate Martin Luther King, Jr. Day at the Ann Arbor Hands-On Museum**

Monday, January 19, 2009

Science is for everyone this Martin Luther King, Jr. Day, when admission to the Ann Arbor Hands-On Museum is reduced to \$2 per visitor and children under 2 and members are free! In harmony with Dr. King's dream of education and opportunity for all, everyone can participate in free sound and music activities throughout the Museum from 10am to 4pm.

"We want people of all ages and backgrounds to feel comfortable with science," says Museum Director of Education and Public Programs Nancy Bryk. "At the Museum science is fun and hands on—it's approachable for all kinds of learners."

Visitors on Martin Luther King, Jr. Day can experience sound by touching and seeing, not just by listening. Go wild whacking pitch pipes of all sizes to compose your own melody. Learn how sound works by hitting tuning forks or by creating your own Slinky sound waves. Make some noise while making your own musical instruments. And rock out playing percussion and string instruments from around the world.

The Ann Arbor Hands-On Museum is excited to provide accessible and informal science education opportunities to Ann Arbor and the surrounding communities. Over 250 interactive exhibits spark creativity and imagination when you explore and discover the world of science and technology. Visit [www.aahom.org](http://www.aahom.org) or call 734.995.5439 for more information.
