## **Gravitate to the Ann Arbor Hands-On Museum for Planetary Play!**

**Saturday, May 12:** Join students from the University of Michigan at the Ann Arbor Hands-On Museum for out of this world adventures, as they explore the wonders of our solar system. Presenters will be on hand from 11am to 3pm to share planet-packed facts.

Learn about the gravitational forces of the planets in an enlightening exhibit. Inflate your mind with information on the Mars Balloon, a probe concept designed to provide detailed data about Mars. Student educators from the University of Michigan will display these materials in preparation for their appearance at the RASC-AL Forum, a competition that gives students the chance to showcase design projects to peers, NASA and aerospace industry-related members. Visitors at the Museum on May 12 can launch into elevating atmospheric activities.

Discover the Scientist within you at the Ann Arbor Hands-On Museum. Explore and enjoy the wonder of science, math and technology in an interactive environment that promotes science literacy. Hours: Monday – Saturday 10am – 5pm, Sunday 12pm – 5pm. Call 734.995.5439 for more information.
