Chroma at Home-a

Gather Materials:

- Washable markers (must be water soluble)
- Coffee filters
- Paintbrushes or small spoons
- Water
- Bowls or plates

Try This:

1. **Create a design** on the coffee filter using the markers. You can draw a picture or an abstract design, anything!
2. **Use lots of different colors**, especially darker ones, for the best result.
3. Put the coffee filter on a bowl/plate and **carefully brush or drip water onto the coffee filter**. Observe what happens.
4. **What happens to the picture?** How are the colors changing? Do some colors change more than others?
